OD	Michael Pilkenton, 46	12/9/19	S Walker/Rainier S

#### WHEEL WOMEN IN BLACK STATEMENT OF HISTORY AND METHODOLOGIES

In the year 2000, WHEEL (the Women's Housing, Equality and Enhancement League), a grassroots organizing effort of homeless/formerly homeless women, founded Women in Black vigils for homeless people who die in King County. When we began 19 years ago, we prayerfully and deliberately decided to stand *only* for homeless people who died outside, or in a public place, or by violence, since these deaths should shock our moral conscience, but are often either ignored or treated with victim-blaming contempt. Over the years we've developed good relations with the King County Medical Examiners Office (MEs). We are grateful to their office and their excellent and compassionate staff. They now study homeless deaths, and publish monthly lists of homeless deaths to us and other stakeholders. The MEs Office monthly lists include both indoor and outdoor deaths, and are issued with a caveat: that they have made a determination of "likely homeless," and that the designation of "no permanent address" doesn't necessarily confirm homeless status. Their list should not be considered comprehensive, since sometimes names are redacted at a family's request, or for other reasons. Our Women in Black lists are *only* outdoor/public place/violent deaths, and we make that determination as best we can with the information available. We consider suicide to be an act of violence. We learn of deaths from the MEs lists, but also from newspaper reports and from word of mouth, friends, and family. Our lists often do not exactly match the MEs lists. Any errors on our Women in Black lists are ours to own, and not the fault of the MEs. **In 2019, there are now 109 people on our Women in Black list. These are outdoor/public place or violent deaths only. Sometimes, some of the Women in Black names are not on the MEs list. In roughly the same period, through early December,, there are 153 names on the Medical Examiners Death list—these are indoor AND outdoor/public/violent deaths.**
