OD - FENTANYL	Teague Silverthorne, 34	12/31/22	West Seattle stairwell

About WHEEL's Women in Black numbers, methodologies and protocols

In the year 2000, WHEEL (the Women's Housing, Equality and Enhancement League), a grassroots organizing effort of homeless/formerly homeless women), later joined by Mary's Place, founded Women in Black vigils for

homeless people who die in King County. All are welcome to join the vigils—women or men, homeless or housed. The vigils last for an hour and are silent. What you wear (black clothing or not) does not matter. We've stood vigil for more than 1,700 people to date including some children.

When we began our efforts more than 20 years ago, we prayerfully and deliberately decided to stand *only* for homeless people who died outside, in a public place or by violence, since these deaths should shock our moral conscience, but were—at the time of our vigil's founding—often either ignored or treated with victim-blaming contempt.

Over the years, we've developed good relations with the King County Medical Examiners Office (MEs). We are beyond grateful for their even-handed, collegial, careful and loving work. Nearly two decades ago they agreed—at our request--to track homeless deaths, to study them, and to publish monthly lists of homeless deaths. The MEs Office monthly lists provided to stakeholders are presumed-homeless deaths only, and include both indoor *and* outdoor deaths. Starting in 2020, WHEEL/Women in Black became able to cull death data from additional sources including deaths of "temporarily housed" people (whom we consider to be homeless) and folks whose housing status was noted to be unknown, when our research indicated a "presumed-homeless" categorization was likely warranted.

Our lists do not exactly match the MEs presumed-homeless death list. We do the best job we can with available information. Any mistakes on our Women in Black lists are the responsibility of WHEEL/Women in Black.

In 2022, there are 288 people on our Women in Black list that we know about. These are outdoor, public or violent deaths only, of presumed-homeless and temporarily housed people, and those for whom our research indicated a "presumed-homeless" categorization was likely warranted.
