**\*\*Linh Head, 42**, died of carbon monoxide poisoning in vehicle in Kirkland on 12/30/23

## **About WHEEL’s Women in Black numbers, methodologies and protocols**

In the year 2000, WHEEL (the Women’s Housing, Equality and Enhancement League), a grassroots organizing effort of homeless/formerly homeless women) founded Women in Black vigils for homeless people who die in King County. All are welcome to join the vigils—women or men, homeless or housed. The vigils last for an hour and are silent. What you wear (black clothing or not) does not matter. We’ve stood vigil for more than 2,050 people to date including some children.

When we began 23 years ago, we prayerfully and deliberately decided to stand only for homeless people who died outside, in a public place or by violence, since these deaths should shock our moral conscience, but were—at the time of our vigil’s founding—often either ignored or treated with victim-blaming contempt.

Over the years, we’ve developed good relations with the King County Medical Examiners Office (MEs). We are beyond grateful for their even-handed, collegial, careful and loving work. Over two decades ago they agreed—at our request--to track homeless deaths, to study them, and to publish monthly lists of homeless deaths.

The MEs Office monthly lists are presumed-homeless deaths only, and include both indoor and outdoor deaths.

Starting in 2020, we became able to cull Women in Black death data from additional sources including deaths of "temporarily housed" people (whom we consider to be homeless) and folks whose housing status was noted to be unknown, when our research indicated a "presumed-homeless" categorization likely was warranted. Our lists do not exactly match the MEs presumed-homeless death list.

We do the best job we can with available information. Any mistakes on our Women in Black lists are the responsibility of WHEEL/Women in Black.

**In 2023, there are 370 people on our Women in Black list that we know about through December. There may be one more update.**

**Since the year 2000, we've stood for more than 2,050 women, men and children! These are outdoor, public or violent deaths only, of presumed-homeless and temporarily housed people.**
